RESTORING HAIR,
TRANSFORMING LIVES

CESARE **RAGAZZI**
— LABORATORIES —

Cesare Ragazzi Laboratories is an established leader in the field of scientific research into hair and scalp disorders, and the development of effective treatments. Since opening our first private clinic over forty years ago, we have treated over a million clients from all over the world.

Suffering from hair loss! ...you are not alone

We know that losing hair can be a deeply traumatic and isolating experience, damaging confidence, wellbeing and self-esteem.

Cesare Ragazzi Laboratories offers proven, non-surgical solutions to hair loss with healthy, permanent results.

**WITH YOU EVERY
STEP OF THE WAY**

Hair thinning in men: common problem, personal crisis

Androgenic alopecia is the most common form of baldness, affecting around 80% of men. The condition causes hair to thin, weaken and grow more slowly. However, studies show that for many men, alopecia is more than just a physical condition. Losing hair can damage confidence around career, relationships and social life. Cesare Ragazzi Laboratories applies the latest in scientific research to halt hair loss and restore confidence.

LIVE LIFE WITHOUT
COMPROMISE

Hair loss affects women too: female alopecia is a growing phenomenon

Female alopecia can be a deeply distressing experience, affecting around 50% of women at some point in their lives. Trauma, pollution, genetics, diet, hormones, ageing and essential medical treatments can all contribute to the condition, causing hair to weaken and fall out. Cesare Ragazzi Laboratories offers unique, proven solutions to restoring hair and rebuilding confidence. Once treatment is completed, women can return to full styling treatments and high-impact sports.

**LOOK AMAZING,
FEEL AMAZING**

CRCLINIC

caring every step of the way

CRClinic

Cesare Ragazzi Laboratories private clinics are calm, sensitive environments equipped with the latest in non-surgical hair enhancement technologies. Before treatment begins you will be assigned a dedicated, qualified consultant who will remain with you throughout your treatment, from assessing your hair and scalp condition to designing a comprehensive personalized treatment plan.

Confidential

Cesare Ragazzi Laboratories has an impeccable track record in protecting high ranking sports people, business leaders and celebrities from media attention. Cesare Ragazzi Laboratories also offers an international mobile clinic service.

The Consultation Process

Assessment

Your personal consultant will first examine your scalp and assess your follicle health, PH and sebum levels using Cesare Ragazzi Laboratories' unique, patented **Tricotest**[®]. This will provide a detailed map of problem areas.

A senior dermatologist will then assess your future outlook, taking into account diet and lifestyle, hereditary conditions and medical history including burns, trauma and chemotherapy.

Based on the assessment your personal consultant will explain, in detail, what to expect, options, treatment costs and timelines.

Treatment options

CRLAB

- Tricosil[®]
- Tricotech[®]

CRHAIR

- CNC[®] System
- CNC[®] Care

The **Tricosil**® Range

Cesare Ragazzi Laboratories treatments have been developed under laboratory conditions by some of the world's leading hair loss experts.

The **Tricosil**® range has been produced using advanced pharmaceutical-grade inhibitors designed to tackle 5-alpha-reductose: the enzyme responsible for triggering hair-loss inducing dihydrotestosterone. All products have been dermatologically tested and comply to international GMP legislation 713/86.

Anti-sebum

Restores balance to the scalp.

Anti-dandruff

Tackles dandruff and irritable, flaky scalps.

Anti-hair loss

Boosts growth in thinning, slowing hair.

Restructuring

Promotes flow and direction.

Styling

Holds style whilst defending pH levels.

Tricotech

Tricotech is patented technology used by trained experts to activate circulation in the scalp, thereby promoting healthy hair growth.

Tricopress®

Reactivates circulation and stimulates blood flow to the scalp. Relieves skin tension and optimizes results from **Tricosil**® by activating its chemical compounds.

Tricopulse®

Pulsating light treatment which combines infra-red light to stimulate circulation, and ultra-violet to eliminate bacteria, dandruff and itching.

Tricopulse ETG®

Improves the transportation of oxygen to red blood cells. Increases capillary activity to help nourish hair follicles and activate cellular metabolism, encouraging rapid hair formation and growth.

LOOK NATURAL, FEEL NATURAL

The CNC® System

Just as each face is unique, each scalp and hairline is unique. Here at Cesare Ragazzi Laboratories we understand this. We have worked in high-technology environments for years developing the **CNC® System**, an advanced, non-invasive, dermatologically-tested, full or partial hair replacement system that restores beautiful hair - seamlessly. Soon after your treatment has commenced you can return to a full, active life including swimming and high-impact sports. Your care will continue under the guidance of your dedicated Cesare Ragazzi Laboratories consultant.

How does the Cesare Ragazzi **CNC® System** work!

PHASE 1 **Scalp mapping**

Computer mapping of the scalp and alopecic area.

PHASE 2 **Cast production**

Cast created using specialist computer imaging, cloning the contours of the skull and scalp.

PHASE 3 **Cloning and pantone matching**

Clone membrane created by robotic technology, replicating exact shape, lines and pantones of client's scalp.

PHASE 4 **Hair selection and matching**

Meticulous selection of high-grade human hair to replicate color and texture.

PHASE 5 **Implanting**

Hairs implanted individually into membrane, mirroring original direction of growth.

PHASE 6 **Non-surgical grafting**

The membrane is non-surgically grafted onto the scalp before professionals complete a final styling.

PHASE 7 **CNC® System fully integrated**

Hair can now be exposed to all activities including swimming and high impact sports. Ongoing care in clinics with **CNC® Care**.

We are passionate about making you look and feel great. Nothing makes us happier than seeing our clients transform their appearance, their confidence and their lives. We may have treated over a million clients, but to us, each client is unique.
